

## **Life proceeds, ignoring with anything!**

4 months of the real military operations are already closed. And who believed that military operations yourself personally will not touch and war will not come once again in yours houses, the already forced was move together with the universities in other cities of Ukraine and to search the students, workers and faculty advisors all over the world. At first there was shock, someone from us experienced all of it already twice (first time - in 2014, when abandoned territories to Luhansk and Donetsk), then is feeling of reality (recovery of sight), and here now is a necessity to work, to search new horizons of further educational labor, work, reinforcement of the faith in renewal of our territories, country and return to peaceful life! Because life does not stand in place, we must believe for it, in the potential and human possibilities that allow to be mobilized, to unite, to get organized, to support each other for the sake of our yet best future!

So all of it is not simple to do, when some colleagues are from other not occupied territories, and out of military operations zone, even, does not understand that means to remain in second times without luggage. When around you already ruins, and it is necessary to rescue the children or support other and think where to go, work, how farther to live. Less for everything thinks that it is necessary to take with you. And already then, when already your house was bombing, understand that was needed o grab something other with you that be to continue valuable life and labor farther. And how is heavily to result in the comprehension of the native, scholars, students, support their faith in the future...

For us, undoubtedly, all will go out, because we are strong, business professionals and the best specialists in education! And ignoring with anything that we are forced to work in such terms, we will not stop to finish telling and confirm, that for us all of it is real to do. Otherwise it can not be another! Our teachers are really the best, because those knowledge, modern practical skills that is today necessary to be inoculated to the students will be useful everywhere. Therefore non-random, our students the most world countries are ready to take away, to give grant on studies and create terms for continuation of their education. But it is desirable to say to those, who already drove out and can not now go back to the houses: do not «forget the root, do not abandon connections with Ukrainian high schools, because it is your professional cradle! You are our real accrete future of highly skilled! We are proud of all of you»! Because if our students are deserving candidates on studies in foreign high schools, then our education is on a correct way!

Therefore, ignoring with anything, support each other, unite the efforts for renewal of our future society by means of our today's graduating students; it will proceed in at higher informative level our educational process, look with definiteness in the future, believe for itself and in our continuous victory on all fronts, including economic, educational and international with Ukraine in our hearts!
